

**REMARKS**

I. Status of the Claims

Claims 1-68 are currently pending. Upon entry of this amendment, claims 1-68 are canceled without prejudice or disclaimer. Applicants retain the right to prosecute these claims in this or another application. New claims 69-88 are introduced and are thus the only pending claims following entry of this amendment.

The amended and new claims are supported throughout the specification, including, for example, the following sections:

II. Amendments to the Specification

The title has been amended to reflect more closely the subject matter of the currently claimed invention.

III. Response to Restriction Requirement and Species Election Requirement

In response to the Restriction Requirement mailed on January 8, 2004, Applicants elect without traverse to prosecute the claims in Group II, which are directed to compositions containing at least one antigen presenting cell chemotaxin (e.g., a chemokine) and at least one antigen. The new claims that are submitted with this response all fall within this elected group.

The Office further requires two species elections if, as here, Group II is elected. The required species elections and Applicant's election follow:

First and second chemokines:	Applicants elect mC10 and vMCK-2. Claims 69-89 read on these elected species.
------------------------------	--

Antigen:	Applicants elect a tumor antigen. Claims 69-75 and 79-88 read on this elected species.
----------	---

Thus, claims 69-75 and 79-88 read on the collective species elections.

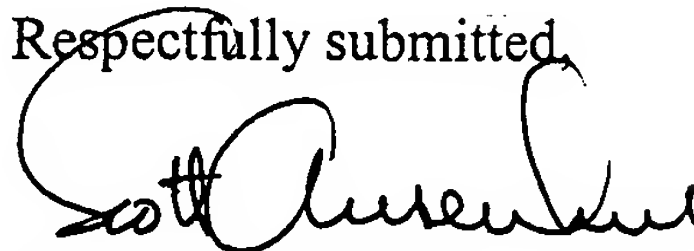

In making this species election, it is Applicants' understanding that the Office will follow the procedure set forth in MPEP §809.02(c), which provides for a complete action on the merits of all claims readable on the elected species, and in MPEP §803.02, whereby upon the finding of allowable species, examination will continue with the non-elected species until all species have been examined or a non-allowable species is found.
